WORK EXPERIENCE

Django Softwares Private Limited

Jan 2026 - June 2026

Full Stack Developer Intern

- Developed and shipped **12+ full-stack features** end-to-end on the **MERN stack** (MongoDB, Express.js, React, Node.js) across 2 live client modules, from API design to production deployment.
- Developed **reusable React components** and **15+ REST API endpoints** covering **OAuth authentication, login/logout, session management, product workflows, and page operations**, reducing duplicate UI code.
- Reduced average API response time by 30%** on 2 high-traffic endpoints by optimizing MongoDB queries, adding indexes, and implementing **Redis caching**, verified through Postman load testing.
- Resolved **production bugs** across Git-based code reviews and daily standups, maintaining zero critical regressions at release.

Crystaltech Services Pvt. Ltd.

May 2025 - July 2025

Web Developer Intern

- Shipped backend and frontend across **3 client projects** (Node.js, Express.js, React) from spec to staging; owned API contract design for 2 modules including request schemas, validation rules, and typed error codes.
- Reduced query latency by 40%** on a high-traffic PostgreSQL table by rewriting unindexed joins and adding composite indexes, verified under load testing.
- Completed 3 Agile sprint cycles: daily standups, peer code reviews, and production bug triage.

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), TypeScript, Python, SQL

Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap, React.js, Next.js

Backend & APIs: Node.js, Express.js, REST APIs, Socket.IO, Prisma ORM, OAuth 2.0

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git/GitHub, Postman, GitHub Actions, Agile

PROJECTS

CodeGecko : AI Code Review Platform

Next.js, TypeScript, Prisma, PostgreSQL — [Live](#)

- Built a **GitHub OAuth + webhook pipeline** that authenticates via OAuth, receives PR events asynchronously, and triggers AI analysis with zero polling; structured feedback delivered without manual reviewer intervention.
- Normalised PostgreSQL schema (repos, PRs, comments, users) with Prisma migrations; responses validated with Zod, wrapped in typed error envelopes, with retry logic for rate-limit handling.

LinkUp — Real-Time Chat Application

React.js, TypeScript, Node.js, PostgreSQL — [Live](#)

- Implemented bidirectional real-time messaging via Socket.IO named event contracts: message delivery, typing indicators, and read receipts all event-driven with no polling.
- Connection lifecycle tracks active socket IDs per room; handles reconnect without duplicate event registration or state leaks; messages persisted to MongoDB indexed by room + timestamp.

AuthEngine — Production-Style Authentication Backend

Node.js, Express.js, MongoDB, JWT

- Built a production-style authentication backend with **7 REST API endpoints**, implementing registration, email OTP verification, JWT access/refresh tokens, session management, and multi-device logout.
- Implemented **10-minute OTP expiry** and **5-attempt/10-minute OTP rate limiting**, with SHA-256 hashing, MongoDB TTL cleanup, refresh-token rotation, HTTP-only cookies, and Gmail OAuth2 email delivery.

EDUCATION

Madhav Institute of Technology & Science

B.Tech in Information Technology (IoT)

Gwalior, MP

2022 – 2026

LEADERSHIP & ACTIVITIES

- Organized a 14-hour hackathon for 180 participants across 30 teams, leading a 6-person committee to design problem statements across 4 domains.
- Practiced **real-world SQL problems on HackerRank** and earned a **4-Star SQL rating (Intermediate)**.

CERTIFICATIONS

AWS Cloud Practitioner	Amazon (2025)
SQL Intermediate	HackerRank (2026)
Software Engineer Intern	HackerRank (2026)
