Bhopal, MP | +91 7970143530 | amardeepchouhan456@gmail.com | [LinkedIn](#) | [Github](#)

## PROFESSIONAL SUMMARY

Software engineer with hands-on experience building full-stack web applications, REST APIs, and real-time systems using JavaScript, Node.js, Express.js, React, and SQL/NoSQL databases. Shipped 3 production-style applications covering authentication, payments, real-time messaging, and CRUD APIs serving 1,000+ simulated records, and organized 2 hackathons totaling 480+ participants across 80 teams.

## SKILLS

**Languages:** C++, JavaScript (ES6+), TypeScript, Python (basic), SQL

**Frameworks & Tools:** React.js, Node.js, Express.js, Socket.IO, Prisma ORM, Bootstrap, REST APIs, Git

**Databases:** MySQL, MongoDB, PostgreSQL

**IoT & Cloud:** Arduino Uno, ESP32, Google Cloud, Supabase, Neon, Aiven

**Data Visualization:** Microsoft Excel, Power BI, Tableau

**Deployment:** Vercel, Render

## WORK EXPERIENCE

### Web Developer Intern — Django Softwares Private Limited

Jan 2026 – Jun 2026

- Built and maintained 8+ REST API endpoints (authentication, CRUD, server-side logic) and resolved 25+ bugs across frontend and backend components in a 4-person team, improving application stability and response times by an estimated 15% over the 6-month internship.

## PROJECTS

### LinkUp Chat Application *React | Node.js | Socket.IO | MongoDB*

- Developed a real-time chat application supporting private messaging, group chats, and instant delivery for 50+ concurrent simulated users using Socket.IO, achieving sub-200ms message delivery latency.
- Implemented JWT-based authentication, user profiles, typing indicators, and online/offline presence tracking, cutting unauthorized access attempts to 0 in testing.
- Designed MongoDB schemas to store and query 1,000+ chat messages efficiently, keeping average query response time under 100ms.

### Trovato E-Commerce Platform *PostgreSQL | React | Express.js | TypeScript | Prisma*

- Built a responsive e-commerce platform with 10+ product pages plus cart and checkout modules using React.js, supporting a full purchase flow end-to-end.
- Developed real-time engagement features (live chat, video calling, file sharing) via Stream APIs and integrated payments, cloud database hosting, image optimization, and monitoring through Polar, Neon PostgreSQL, ImageKit, and Sentry — cutting image load size by an estimated 40%.

### GitHub Profile Analyzer API *Node.js | Express.js | MySQL | GitHub API*

- Developed a REST API to analyze GitHub profiles and repositories across 100+ test profiles, generating developer activity and tech-stack insights via 10+ CRUD endpoints with pagination and sorting.
- Deployed the application on Render with rate limiting, CORS, and Helmet, blocking 100% of simulated unauthorized requests in testing.

## EDUCATION

### Madhav Institute of Technology & Science

B.Tech in Information Technology (IoT) — CGPA: 7.55

Gwalior, MP

2022 – 2026

## LEADERSHIP & ACTIVITIES

### Code-Coalescence Hackathon — Organizer

Mar 2025

- Organized a 14-hour hackathon for 180 participants across 30 teams — the first event of its scale in 6 years — leading a 6-person committee to design problem statements across 4 domains.

### Smart India Internal Hackathon — Organizer

Sep 2024

- Organized an 8-hour hackathon for 300 participants across 50 teams, coordinating logistics, judging, and mentor support with zero major disruptions.

## CERTIFICATIONS

- AWS Cloud Practitioner — Amazon (2025)
- SQL Intermediate — HackerRank (2026)
- SE Intern — HackerRank (2026)
- SQL & Relational DBs 101 — IBM (2026)
